

Welcome to the Technology Team at beyond

We are looking for
dynamic engineers
to join us.

Our technical expertise brings innovative experiences to life and captivates millions of users every year, on the ground, in the air, or sports arenas.

What are you going to work on:

- **Contributing to the development** of robust and well-tested code
- **Reviewing and debugging** existing codebases
- **Assisting in troubleshooting** software application issues
- **Working together** with other disciplines (UX, UI, Product) to create software features
- **Get exposure to new technologies** e.g. Java Micro Services, React, NodeJS Development, AWS, Onboard Airplane Servers etc.

What do we do?

Whether it is travel, retail, hospitality or even sport - we seek to deliver solutions to some of these industries' toughest challenges.

Our clients chose Beyond to tackle some of their most novel and complex challenges in the industry because our technology teams are experts in their field. Our current projects include air to ground connectivity, offline payment solutions on aeroplanes, live sports dashboard for Sony Sport, data analysis and full-stack development.

As well as providing a raft of technical services, we pride ourselves in the ability to partner and integrate, with clients' existing technology providers, to build not only reliable but cutting edge solutions.
